

PYTHON

# AGENDA

## (HOPEFULLY)

- What is Python?
- Why Python?
- jupyter first.
- Hello World is too cliché!
- Variables, Strings and Numbers
- Lists and Tuples
- If, else and what?
- Loops and more  $\infty$
- Input, and functions
- Dictionary, classes, list comprehension, libraries, GUI, damn !

**WHAT IS PYTHON  
AND WHY IS PYTHON?**

<https://goo.gl/akC2yq>

**PRESENTATION'S  
OVER. LET'S CODE !**

THANK YOU
